## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. This is the first office action for serial number 10/715,189. This application contains 4 claims numbered 1-4.

#### **Abstract:**

2. On first line of the abstract, "t" should be deleted.

Correction is required.

Claim1, line 9, after "back and forth;" -- and -- should be inserted.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the slot hole" in line 5. There is insufficient antecedent basis for this limitation in the claim.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3632

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 3,082,988 to Holden.

Holden discloses a suction cup mounting comprising a sucking disk body (20) with a threaded shaft (26) on top and a rubber-sucking disk (20) on bottom; a compression stand (19) with a connecting sleeve (30 generally) on top and a shell plate (28) on bottom; the shell plate is smaller than the rubber sucking disk of the sucking disk body; a through hole is on the center of the shell plate; the through hole leads to a slot hole (an open area) (see Fig. 1 or 2), the threaded shaft of the sucking disk body passes through the through hole of the compression stand and screws with the adjustable threaded nut to move the sucking disk body back and forth; and a pole (25 generally) connecting to the sleeve of the compression stand.

Regarding claims 2-3, Holden also shows the bottom of the shell plate being curved shape and the pole can be stretchable.

Regarding claim 4, Holden also shows a fixing top (23, 24) being located on top of the pole.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.:
